

ANGLO

AIR POLLUTION
KILLS 9,500

LONDONERS A YEAR

LONDON'S LEVELS OF
POLLUTION ARE ILLEGAL

**IT'S TIME TO
DO SOMETHING
ABOUT IT**

THERE IS NO PLANET B

It's inarguable: we are living unsustainably and therefore must change the way we live and work.

At the present rate of energy consumption, we will need **2.3 planets by 2050.**

6 billion kilograms of waste is dumped into the oceans every year.

80% of all waste that ends up in landfill sites could be...

RECYCLED

92%

of people worldwide live in places where air pollution exceeds safe limits.

We need to act together: the collaborative effort of every person living and working in our capital will make a difference.

HOW ARE YOU CONTRIBUTING?

Your business is currently contributing towards the levels of air pollution in London. How much it contributes is down to you.

Anglo has developed an emissions calculator to help you discover the impact your business' yearly supply deliveries are having on the environment.

Using multiple suppliers with multiple deliveries is an inefficient way of purchasing, both environmentally and financially. After all, more delivery vehicles on the road means more emissions pumping into our atmosphere - and it costs you more, too.

The results may surprise you:

9 in 10 OF OUR CLIENTS

have no idea about the severity of their current impact on pollution levels.

HOW ARE YOU CONTRIBUTING?

JOINED UP THINKING

Anglo offers an end-to-end process that helps you save time, money and emissions.

Consolidate suppliers and bring your products and services under one roof, meaning less administration time, lower costs and minimal disruption. Just one call or one click.

Go zero emission with our fleet of electric delivery vehicles. Products delivered with a conscience, without negative impact.

Rationalise deliveries to receive what you need, when you need it, but with less impact on congestion and the environment. Increased practical convenience.

See it all at a glance on our bespoke Chameleon platform, Anglo's own marketplace that allows you to order, manage and maintain every product and service your business uses. It's the ultimate procurement tool that eliminates headaches and mitigates risk.

WASTE DOESN'T HAVE TO BE WASTED

Anglo is working with the team at Remarkable to re-engineer waste into a valuable resource.

We turn paper and dry waste into useful products: like notebooks from old coffee cups with pages from shredded paper; or pencils from polystyrene cups.

Instead of sending your paper, cardboard, coffee cups and other dry waste to landfill, work with waste management experts to produce a full cycle economy. Receive your own bespoke branded "I used to be..." stationery items, and become part of the solution to ecological waste disposal.

This is just one example of Anglo's collaboration between manufacturers, suppliers and clients, engineered to help every party make a difference.

Bespoke printed covers with your own branding and messaging

Company message can be printed on every page

If we manage your confidential waste, add the message - Made with recycled paper from "Your Company Name"

Full method controls supplied

Single page insert with your own content can be added

NATIONAL CLEAN AIR DAY & NO IDLING

Anglo is joining London's leading initiatives to lower pollution and promote good air quality in our capital.

We hit streets of the West End on 15th June 2017 to celebrate the first National Clean Air Day. Our team aimed to raise awareness of the startling facts behind air pollution, and handed out recycled goodies to those living in, working in and visiting London's West End.

Our activity sparked a genuine passion in the eco-conscious passers-by, but also a flurry of firm disbelief – a testament to how important raising awareness of air pollution really is.

We're also supporting Anti Idling initiatives, encouraging drivers to switch off their engines when stationary. Every tiny action makes an impact.

Keep an eye out on our social media to see how we celebrate Clean Air Day and other activities this year!

Anglo's CSR Director, Russell Hodson, says:

"Our team feels that supporting National Clean Air Day is incredibly important, as every business in London is responsible for doing their bit. Our fleet of electric delivery vehicles work to actively reduce air pollution and congestion, with the aim to help London breathe easier."

BRINGING LOW EMISSION DELIVERIES TO MAYFAIR

In September 2017, Anglo and Grosvenor began collaborating to consolidate Grosvenor's staff personal deliveries. These deliveries are now consolidated with their office supplies and arrive in a low emission vehicle saving an average of 15 delivery trips per day.

Grosvenor and Anglo are now rolling out this consolidated solution to businesses in Mayfair and Belgravia too, allowing them to benefit from low emission deliveries – and helping to decrease traffic pollution across Grosvenor's London estate.
